

Measuring Guide

Measure your closet opening in under 10 minutes. It's easier than you think.

FREE GUIDE

BEFORE YOU START

Grab three things: a **tape measure**, a **pencil**, and something to write on (paper or your phone). Clear the closet opening so you can easily reach both sides. That's it. No special tools, no second person needed, and the whole process takes less than 10 minutes.

1 STEP 1 · Measure the width

Hook your **tape measure** onto the **inside left edge** of the opening and stretch it straight across to the right edge. Measure **three times**: near the top, in the middle, and near the bottom. Openings are rarely perfectly square, so write down all three measurements. We'll use the smallest measurement.

2 STEP 2 · Measure the height

Place the **tape measure** on the **floor** and measure straight up to the **top of the opening**. Again, measure in three spots: left, center, and right. Write them all down. We'll use the smallest measurement.

3 STEP 3 · Look around the opening

Check for anything that could get in the way of the new doors, such as **light switches, vents, outlets, or unusually thick trim** around the opening. Snap a photo and make a note of it next to your measurements. This helps us plan for a perfect fit.

COMMON MISTAKES TO AVOID

- **Measuring only once.** Always take three measurements and send us the smallest one.
- **Measuring your old doors instead of the opening.** Measure the opening itself, edge to edge.
- **Measuring over the trim.** Hook the tape measure onto the inside edges of the opening, not the outside of the trim.
- **Rounding up.** Give us exact numbers. We'll take care of the fit.
- **Forgetting the details.** A switch, vent, or other obstruction you don't mention can slow things down.

WHAT HAPPENS NEXT

- 1 Send us your measurements at **Olielinvestments@gmail.com**. We'll double-check everything before we build your doors.
- 2 Delivery and standard installation are always **FREE**.
- 3 We deliver and install within **14 business days** of your confirmed order and measurements.
- 4 Installation itself takes **less than an hour**.

PREFER A PRO?

Don't feel like measuring? We'll come to you. Book an **in-home measurement visit for \$149** and we'll handle everything. This guide is free either way.
